

BRIGHTTREE INVENTORY SYNCHRONIZATION

Keep Inventory Accurate. Keep Brighttree in Sync.

Brighttree Inventory Synchronization connects HME360 and Brighttree in real time, allowing your team to manage inventory from a mobile device while Brighttree updates automatically in the background.

Counts, transfers, adjustments, and dispensing actions completed in HME360 are instantly reflected in Brighttree, eliminating duplicate work and keeping inventory accurate across systems.

WHY IT MATTERS

Save time and eliminate double work
Complete counts, transfers, and adjustments in seconds.

Keep Brighttree accurate in real time
Inventory changes sync instantly, eliminating manual entry and delays.

Rely on inventory you can trust
Inventory remains accurate and up to date across systems.

Key Capabilities

- Manage inventory counts, transfers, and adjustments directly from a mobile device.
- Transfer serialized items instantly with a single tap.
- Adjust item quantities quickly using a simple scan.
- Automatically dispense items to sales orders at the time of delivery.
- View the last known location of every serial number through a serialized archive.
- Keep transfers and adjustments current during cycle counts.
- Monitor inventory status changes in real time.
- Quickly transfer missing or lost items to ensure accurate financial tracking.
